PROFILE

B.Tech graduate in Artificial Intelligence and Data Science with an interest in Machine Learning, Generative AI, Natural Language Processing, data analytics, and AI solution development. Experienced through an academic NLP project involving short-text summarization of YouTube video transcripts. Strong foundation in Python, SQL databases, data analytics, and Tableau, with a proactive approach to learning AI technologies, debugging, documentation, and collaborative project work.

CORE SKILLS

Programming: Python

Data & Analytics: R,Advance excel

Databases: MySQL, Oracle SQL

AI / ML Focus: Natural Language Processing, LLM,NLP,RAG

Professional: Communication, Team Collaboration, Problem Solving, Documentation

PROJECT

Short Text Summarization for YouTube Video Transcripts using NLP — Team Member, International Conference on Intelligent Computing (IConIC)

- Collaborated with classmates to develop and refine a research paper focused on NLP-based short text summarization.
- Explored an AI application for generating concise summaries from YouTube video transcript text.
- Contributed to research, technical discussion, content refinement, and preparation for conference submission.

EDUCATION

B.Tech – Artificial Intelligence and Data Science Panimalar Institute of Technology 2020–2024 | CGPA: 7.8

12th Grade Dhivya Matric. Hr. Sec. School 2019–2020 | 60%

10th Grade Saradha Matric. Hr. Sec. School 82%

ROLE ALIGNMENT

- Interested in supporting ML/AI model development, data preprocessing, evaluation, and documentation.
- Interested in Generative AI, LLM applications, prompt engineering, RAG, and AI-powered solutions, with a willingness to build these skills.
- Prepared to contribute to data analysis, dashboards, databases, API-integrated applications, testing, debugging, and team-based development.
- Committed to continuous learning, responsible AI practices, technical research, and emerging AI technologies.

LANGUAGES

English, Tamil,
